TEXTS:

Bellman, Allan E., Chavis Bragg, Sadie, Charles, Randall I., Hall, Basia, Handlin Sr., William G., and Kennedy, Dan. Prentice Hall Mathematics Algebra 2. Pearson, 2004.

COURSE OVERVIEW:

This course is designed for the college-bound student. In this course, the basic concepts from Algebra I are enriched. Topics studied include graphing, analyzing, and interpreting functions including polynomial, absolute value, rational, exponential, trigonometry and logarithmic functions; systems of linear equations and inequalities; exponents; radicals; sequences and series.

REQUIREMENTS:

Notebook

Scientific or Graphing Calculator (TI-83 or TI-84)

Graphing calculator is highly recommended

GRADING POLICY:

- As a non-unit based course each semester will have one final cumulative exam.
- You will have one opportunity each semester to retake a chapter test or quiz.
- You must complete a review process set forth by the teacher in order to re-take a test/quiz.
- The retake score for a given test will be the score that is recorded in the grade book.
- The Algebra II classes will use the following scale for their grades:

Practice Assignments	10%
Preliminary Assessments	90%

The culmination of the above grades will comprise 80% of the semester grade. The other 20% will be the cumulative semester exam.

ASSESSMENTS:

Assignments consist of Concept quizzes, notebook grades, in-class work and homework.

- Assignments vary in point value.

Assessments consist of Quizzes (50 points each) and Tests (100 points each)
